

# DINAH MADGE

**Dinah has been working as a volunteer with Tijs and Jessica (AMEN partners) who have a ministry to show God's love to the Roma People.**

I got back to Romania just over a month ago. Covid restrictions were still in place here so we could not run our programs with the children such as the children's club and the mothers and babies.

It has been busy though. Jessica cleared the barn at their place with a little help from me when I wasn't needed to keep the children occupied. The barn was full of boxes of aid which all needed to be checked and taken to the centre in Geoagiu. The clothes were then given out to the people. Praise the Lord it was a beautiful day so we could just put all the boxes outside. We needed all our girl power for the boxes as the men were busy taking the tiles off the roof of the barn! We had help from the wonderful Alina and Simona. The barn is getting a new roof and a raised wall and will be used to provide accommodation for groups in the future.

Tijs went to the Ukraine border for four days to help Pete Malkin who has been helping with evacuations there since the war began. They are my Heroes in the faith.

The restrictions are now lifted so we hope to start back with mothers and toddlers next week.

On Monday 4<sup>th</sup> April a team will come from Belgium to do some outreach and evangelism. Jessica and I have put together a program for them. They will do some work with the children and visit some families in the village. They will also do some street evangelism in the town of Deva where we go to church. It will be long days starting at 8am and ending late.

The disabled group have not met yet due to Covid restrictions but we hope to have an Easter meeting on 16<sup>th</sup> April.

I will then be back in the UK for three weeks. Hoping to catch up with people then.

- Please pray for the disabled group meeting that we will know Jesus's presence and learn more of him whatever our abilities.
- The visiting team and the families they hope to reach out to
- The work on the barn, for safety and finances to do the job
- And health and strength for all of us
